---

Education

Bachelor of Science in Mathematics-Computer Science
University of California, San Diego, La Jolla, CA
Expected Graduation: March 2025

Project Experience

FitByte – Developed a React-based application enabling users to track and customize exercise routines. Designed and implemented dynamic input forms using custom hooks to manage specific exercise details, such as reps, sets, cardio options, and weights. Refactored codebase to enhance usability and scalability. Collaborated with a team to prioritize user-centered design principles, improving overall UI/UX.

Work Experience

Server
Blue Ocean Sushi/Harumama, La Jolla, CA
December 2021 – Present

- Created a welcoming atmosphere as the first point of contact, setting a positive tone for the dining experience.
- Maintained order accuracy and efficiency through clear communication with kitchen staff, earning recognition from satisfied customers.
- Advised guests on menu options, addressing food allergy concerns with care and attention to detail.
- Resolved customer complaints promptly and professionally, maintaining a strong reputation for excellent service.
